

# COVID Regulations

TNT Pisa 2023

Official Version as of 04/01/2023

The organising committee has decided that all participants in the event, regardless of their country of origin, must fill out a Health Declaration, that will be provided to the accepted attendees.

Not mandatory but recommended is a valid EUROPEAN DIGITAL COVID CERTIFICATE (also known as the “Green Certificate”) that has proof of full vaccination (completed at least 10 days before traveling) OR a one that has proof of recovery from COVID-19 in the last 180 days.

During the event, if any of the participants contract COVID-19, the organising committee will help him/her find proper accommodation and will cover its costs during the event period. However, AS Pisa will not cover the cost of accommodation outside of the event dates. During the isolation period, the participant will not be able to attend any of the event activities.

## **MEASURES IN FORCE UNTIL 30 APRIL 2023**

In Italy, is no longer mandatory to show the “Green Pass” to access facilities and means of transportation, nor it is to wear FFP2 type respiratory protective devices.

It is however recommended to wear respiratory protection devices in all public indoor places.

Travellers from China must undergo an antigen-test (swab) upon the arrival at the airport.

It should be remembered that if you are undergoing a molecular or antigenic test in order to return from Italy, please take into consideration the possibility that the test gives a positive result. In this case, it is not possible to travel by commercial means and you are subject to the quarantine and containment procedures required.

Also, having had contact with a person testing positive to COVID-19 and presenting symptoms leads to the obligation to undergo a test, with what follows in case of positivity.

It is therefore recommended to be careful during the trip, taking the necessary safety measures at all times.
